EDUCATION

Stony Brook University

Bachelor of Science in Computer Science, GPA: 3.89

Expected Graduation: May 2025

Stony Brook, NY

Relevant Courses: Data Structure and Algorithm, Object Oriented Programming, Computer Networks, Operating System, Algorithm Analysis, Software Development

EXPERIENCE

Undergraduate Teaching Assistant

Stony Brook University

Aug 2023 – Present

Stony Brook, NY

- Prepare and conduct weekly recitations for 30+ students in the course Data Structures and Algorithms.
- Host office hours to assist students with debugging code, and enhance the understanding of technical concepts.

Peer Mentor

Stony Brook University

Aug 2022 – Present

Stony Brook, NY

- Plan and facilitate activities/events for mentees; events have a total of 120+ participants overall.
- Actively provide mentees with academic and professional resources to enhance their development and involvement on campus.

Application Design Sprint Intern

TECH:NYC Google

Jul 2022 – Aug 2022

New York, NY

- Collaborated with a team of five led by a Google employee to design and prototype a product using Figma that won the Application Design Sprint best-executed award.
- Optimized the design process using CUJ (Critical User Journey) and wireframing, which increased the efficiency of the team by 30%.

PROJECTS

Post-It Note Extension | [GitHub](#) | *Express.js, Node.js, React.js, HTML, CSS, MongoDB*

- Developed a full-stack Chrome extension that enables note-taking on websites, leading to a 20% improvement in study efficiency.
- Designed and built RESTful API with express.js to implement C.R.U.D(Create, Read, Update, Delete) operations on MongoDB database with React as the frontend.
- Improved security by integrating authorization and authentication protocol into the application using JWT(JSON Web Token).

Cryptocurrency Trade Monitor | [GitHub](#) | *C, Git, CLI(Command Line Interface)*

- Programmed a multi-processing command line interface program to monitor multiple ongoing trades.
- Implemented low-level system signals, non-blocking IO, and read/write pipes in Linux for inter-process communication.

Tic-Tac-Toe Server | [GitHub](#) | *C, Git, CLI*

- Programmed a multi-threaded Tic-Tac-Toe server that supports up to 65 users concurrently.
- Optimized the application by using mutex and semaphores to protect resources.

SKILLS

Languages: Java, C, JavaScript

Frameworks/Technologies: React.js, Node.js, Express.js, Git, MongoDB, Figma, HTML, CSS
